Re: Go Performance Products

BMG currently leads the Southern African market with some of the most powerful, respected brands in the world. We continually source innovative, cutting-edge products that deliver to our customers' individual needs. BMG is also continuously looking for additional premium quality products to expand and support our current products.

One such product line is the range of Go Performance Products, which BMG has now sold for a year. We are supplying the complete scope of Go products to a wide selection of customers, ranging from Agricultural, Automotive, Mining, Timber etc. to name but a few.

Our customer base for Go products includes a multinational companies, some of South Africa's most prominent companies and smaller companies and the feedback from all of them is unanimous - Go products perform exceptionally well.

Due to the extremely high wax content of the Go Wax, it is an excellent by-product to supply with transmission chains. It is suitable for 80% of the applications and financially it's very competitive in a low margin market such as ours.

Go Products is also very flexible in terms of the designing of specific products for challenging applications, packaging of products as per special customer requirements etc. Delivery times are always met which prevents any possible logistical delays.

Should you require any additional information, please do not hesitate to contact me immediately.

Yours faithfully

Carlo Beukes
